

WHAT IS CLAIMED IS:

1. A glove box assembly for automobiles comprising:

a housing selectively mounted in the left or right side

5 of an instrument panel from a driver seat of the automobile;

a lid rotatably attached to the front part of the housing;

a knob rotatably fitted in the lid such that the housing is opened or closed by means of the lid; and

10 an identifying member for identifying the knob fitted into the lid.

2. The assembly as set forth in claim 1, wherein the identifying member comprises:

15 a guide groove formed at the inside of the lid; and

a guide protrusion formed at the knob such that the guide protrusion is inserted into the guide groove.
